

HNPW

SUSTAINABLE PROCUREMENT CRITERIA

REH Sustainable Procurement Working Group
05-02-2024

AGENDA

1. Overview (30min)

- Presentation of the Working Group and project
- Sustainable supply process
- Challenges and solutions
- SPCD tool presentation

2. Success stories (30min)

- Hulo, ACF, etc

3. Feedbacks & conclusions (30min)

SPEAKERS

ACF - Céline Heim
– *Sustainable Supply Chain Coordinator*

Groupe URD - Johana Bretou-Klein
– *Environment/Climate researcher, REH coordinator*

PUI - Gilles Grappe
– *Deputy head of logistics – Support logistics sector*

Hulo - Philine Moucheront
– *Environment and Ecology Expert*

THE REH

Réseau Environnement Humanitaire

Francophone humanitarians & development workers aiming to **reduce the environmental footprint of aid**

200+ members

30+ orgs

4 working groups to operationalise

SUSTAINABLE SUPPLY WORKING GROUP

WORKING GROUP MEMBERS

ACF - Céline Heim – *Sustainable Supply Chain Coordinator*

PUI - Gilles Grappe - Responsable *Logistique adjoint*

HI - Maxence GIRAUD – Directeur Logistique

Croix Rouge – Amadou Diao - *Référent log régional*

Oxfam Intermon – Alice Reboux – *Supply Manager*

MDM - Céline Laumonier - *Superviseur Unité Achats*

ACTED - Camille Tetard - *Green Supply Chain Officer*

REH/Groupe URD - Johana Bretou-Klein - Chargée de recherche
environnement/climat

Collaborative Sustainable supply Working Group

WORM consortium - HORIZON PROJECT

hulo (Humanitarian Logistics) cooperative

WHAT DOES SUSTAINABLE PROCUREMENT INCLUDE?

<https://app.sli.do/event/25tpgpUEmW45FvYmthHtrQ>

slido

What does the term "sustainable procurement" entail?

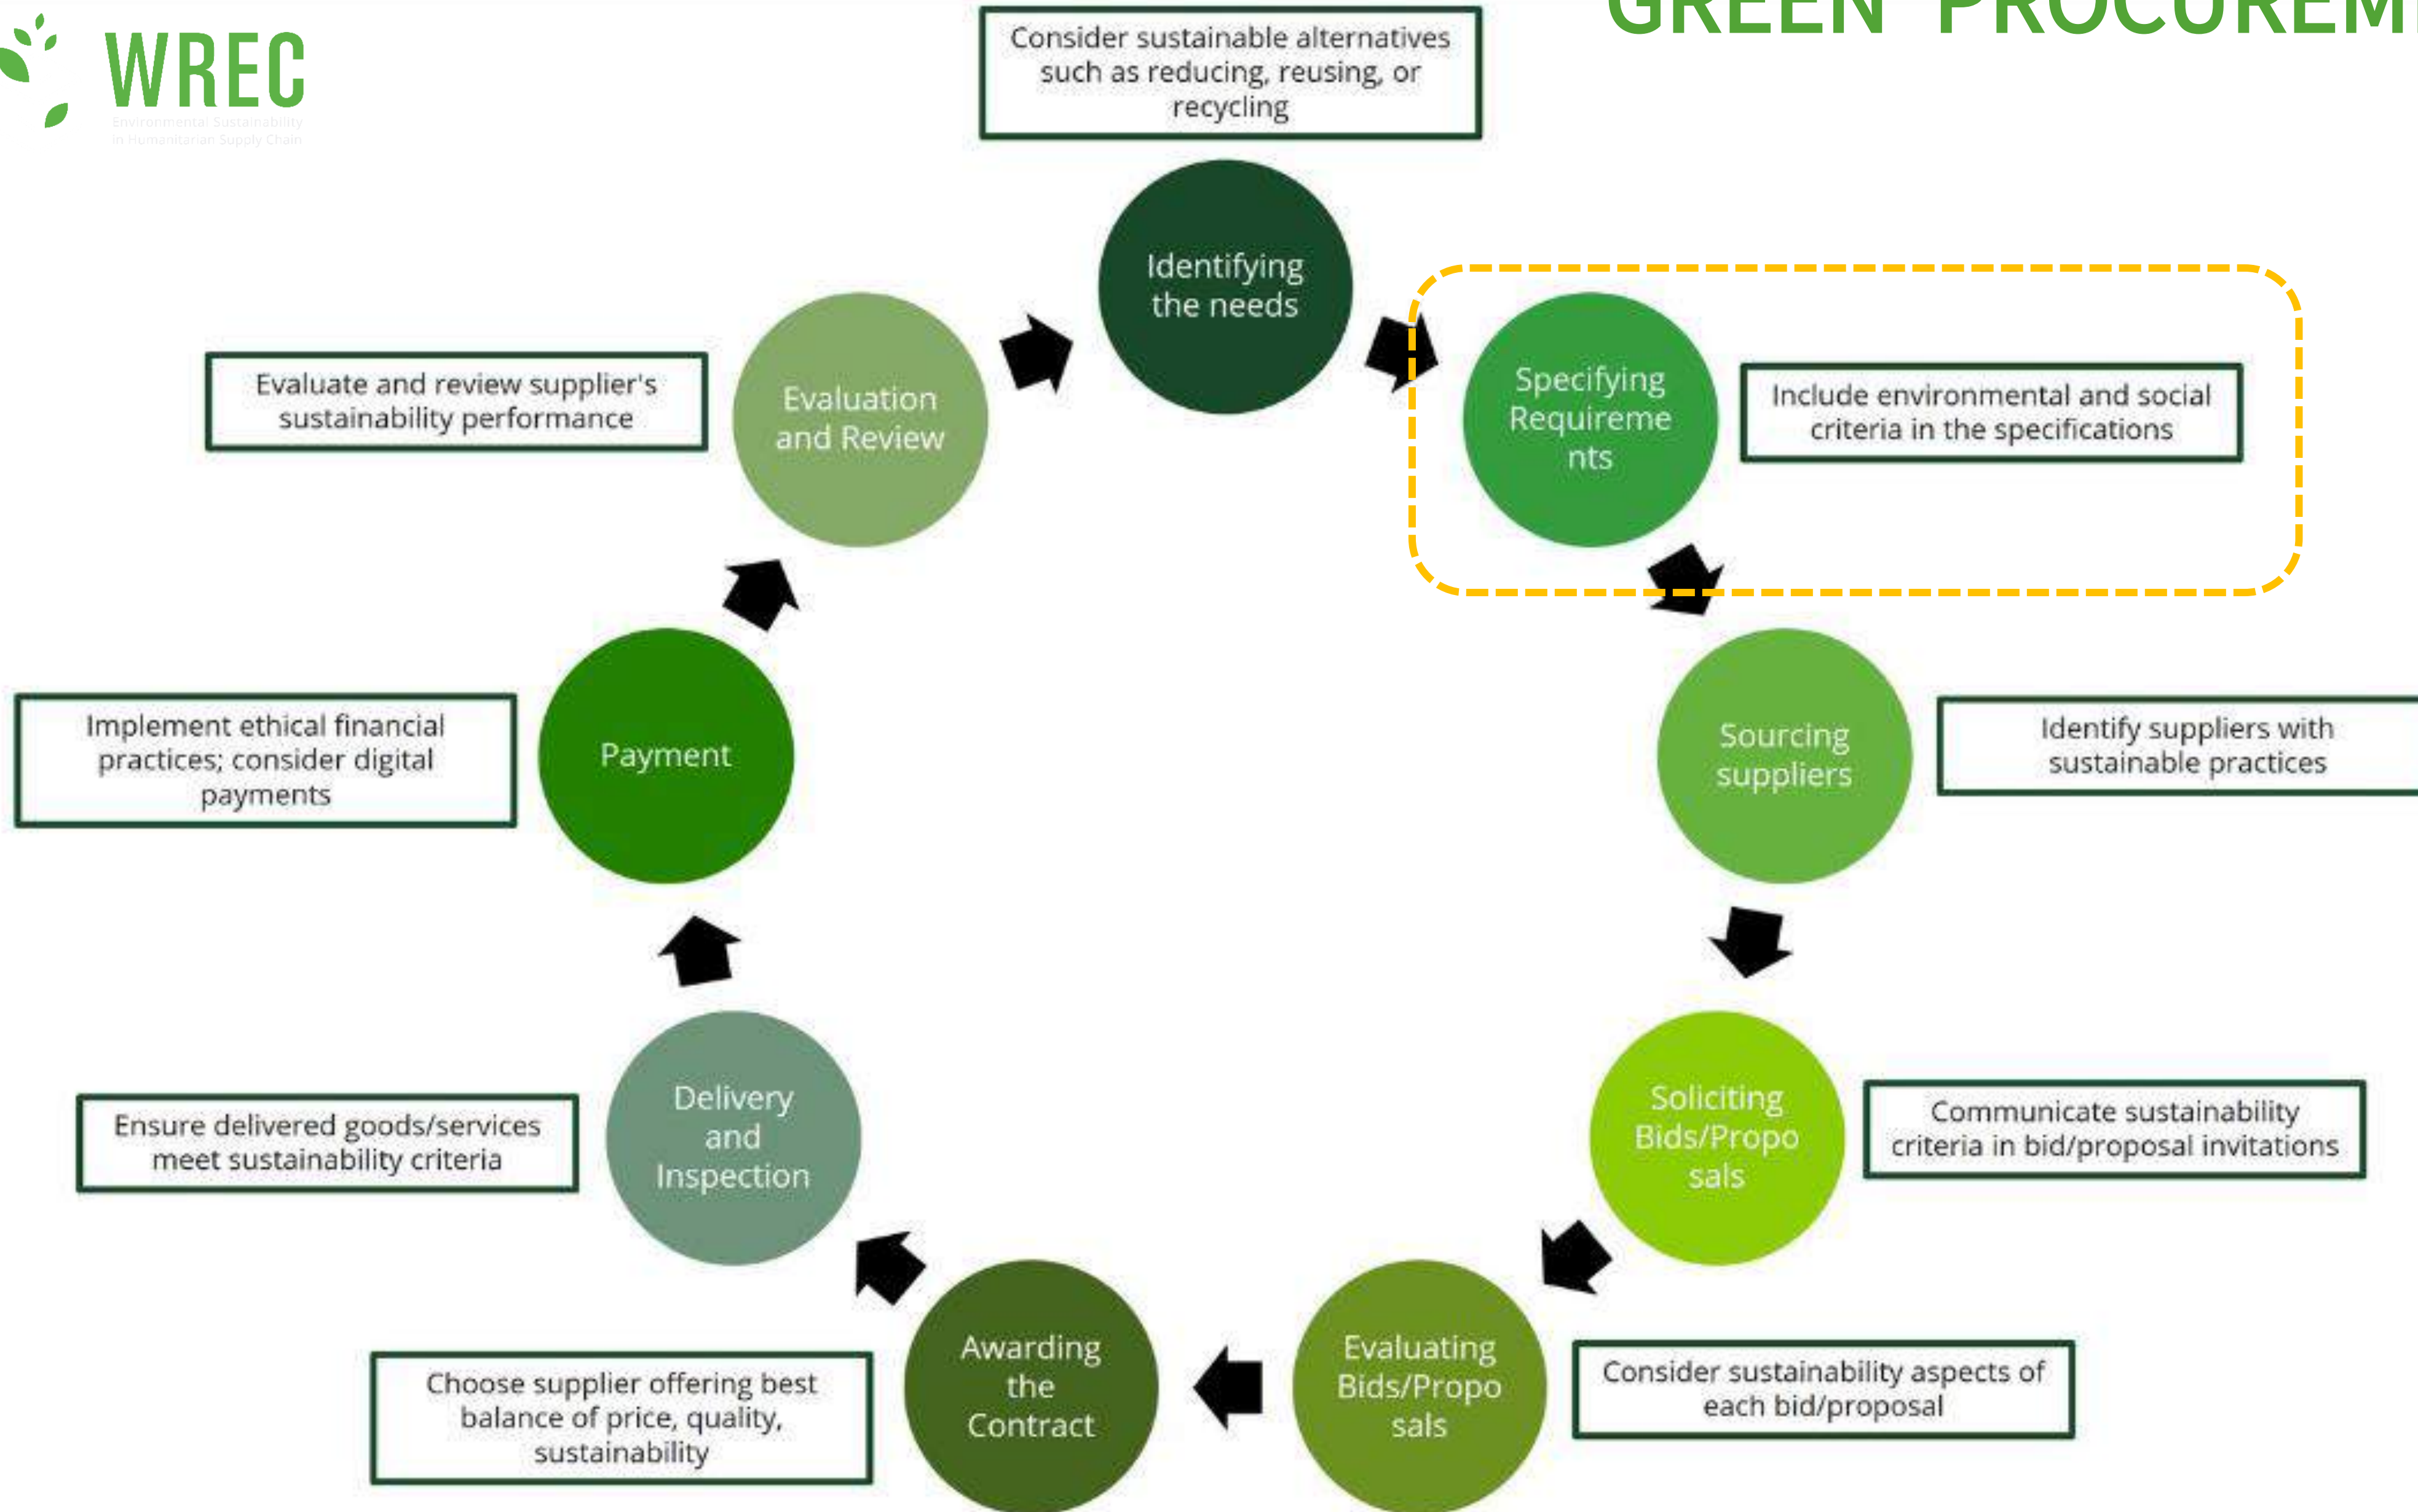

'GREEN' PROCUREMENT

- Green Procurement is considered as a strategic approach that emphasizes environmental responsibility in purchasing decisions. This approach prioritizes goods and services that are committed to minimizing environmental impact, particularly in terms of reducing energy consumption and waste generation.

VS

- Sustainable Procurement incorporates broader ESG (Environmental, Social, and Governance) aspects and builds upon the principles of Green Procurement.

'GREEN' PROCUREMENT

IMPACTS

Examples :

Climate change
GHG associated with production, transport, usage and disposal of the goods

Energy
use, efficiency, renewability

Water
use, recycling, water pollution

Waste
generated during usage and disposal, product efficiency and longevity: options to reuse, recycle, buy back, upgrade

Toxic substances
pollutants emissions, harmful to human, animal or environmental health

Economic benefits
operating costs and maintenance, end-of-life disposal costs

Social responsibility and ethical practices
working conditions, diversity at work, impact on local communities

Resource use and intensity
raw materials, renewability of resources, impact on landscape and habitat

Supply of goods:

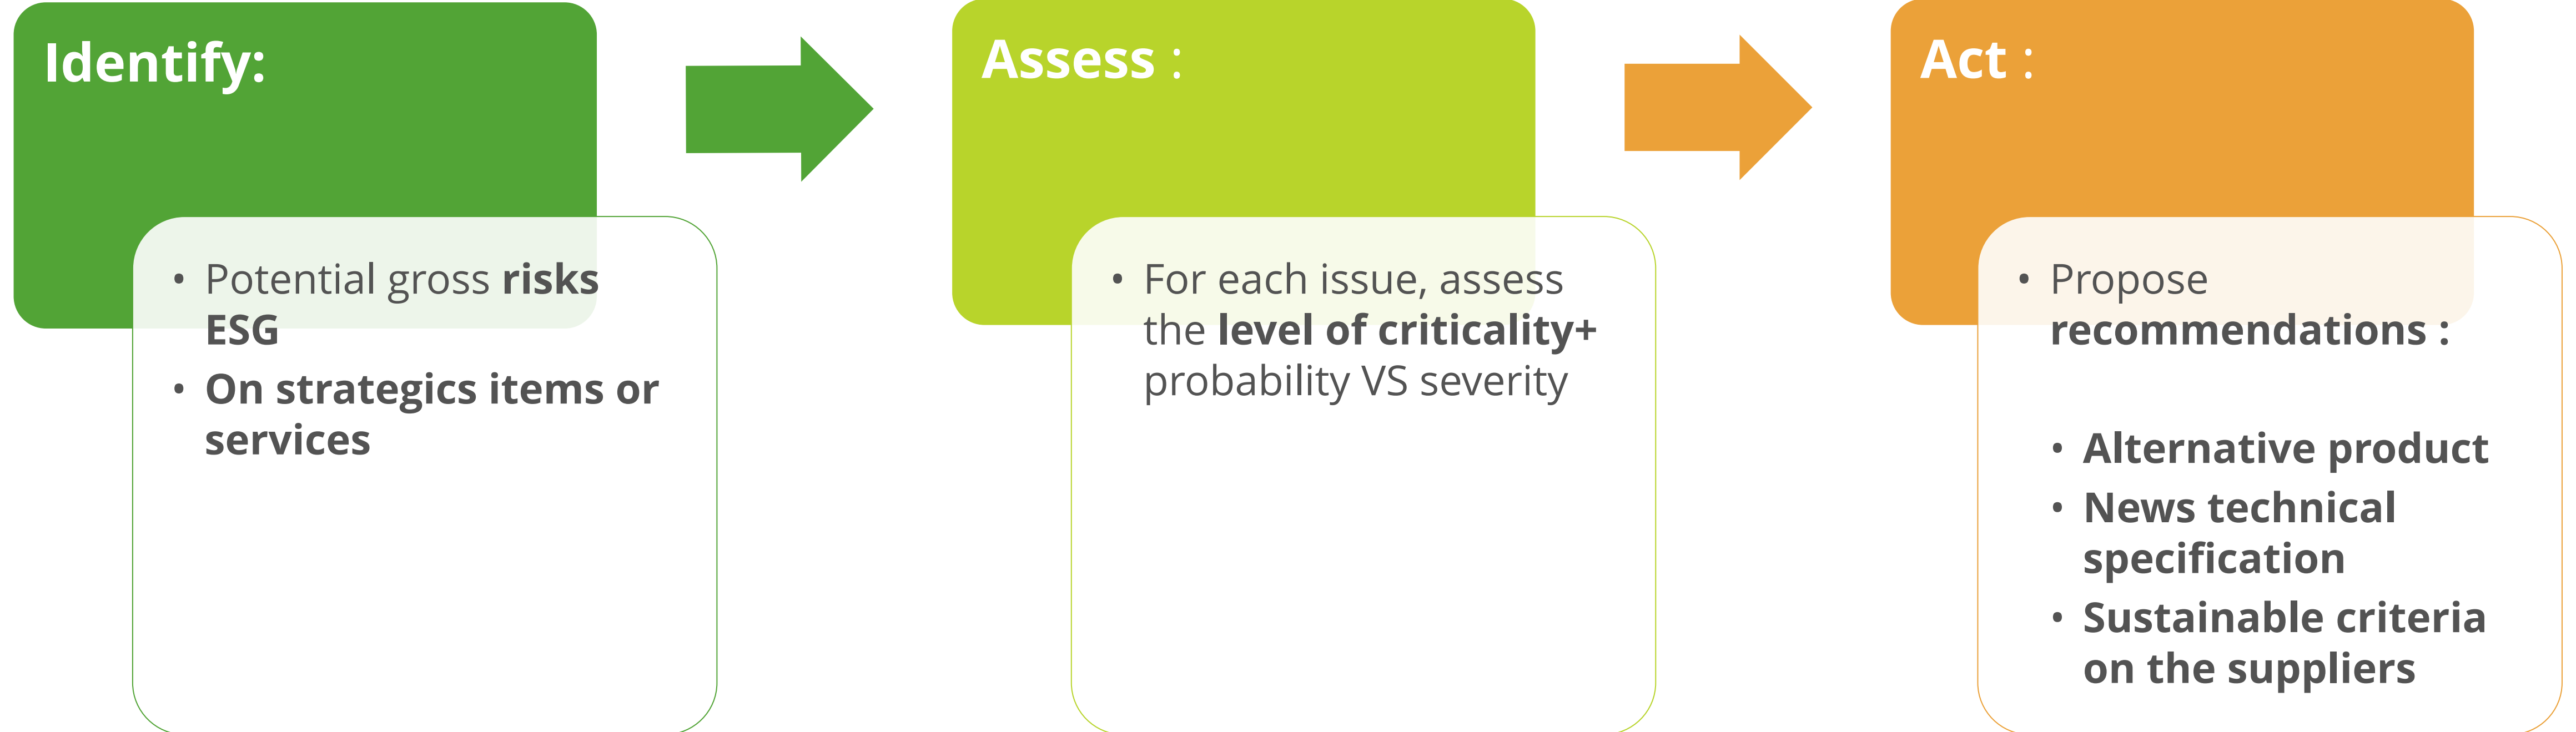

Pay particular attention to sustainability impacts during manufacturing, shipping, utilization (e.g.: Energy/ water/ fuel consumption, consumables), maintenance (e.g.: spare parts), end-of-life disposal options

Supply of services:

Pay particular attention to contracting practices, working conditions (e.g.: living wage, forced labor, impact on local communities) and product used to deliver the service (e.g.: paper for printing services, cleaning products for facility management.)

ANALYSIS OF ESG RISKS

ENVIRONMENT SOCIAL AND GOUVERNANCE

SUSTAINABLE PROCUREMENT TOOL

OBJECTIVES

- ❑ Define **sustainable & inclusive** procurement criteria and build a **good practice reference table**
- ❑ **Public targeted** : programs and supply department (**field** and HQ)

SUSTAINABLE PROCUREMENT CRITERIA DATABASE (SPCD)

GENERAL CRITERIA

SUPPLIER's criteria

- Labour right and protection
- Sustainable development approach (social, environmental and economic) and/or Corporate Social Responsibility (CSR)
- Sustainable internal practices
- Diversity and inclusion policy or approach
- Women empowerment
- Involved in the support and development of the local community
- Supply chain and eco-efficient transport
- National and/or international certification
- Greenhouse gas Reduction Strategy
- Supplier location

PRODUCT/SERVICES's criteria

- reusable or recyclable goods
- goods from recycled material
- Lifespan and durability
- Sustainable product through its life cycle
- Sustainable Packaging
- Eco-friendly label
- Location of purchase (local production)
- Location of labor services
- Sustainable development in its project methodology (social, environmental and economic dimension)
- financial inclusion of vulnerable groups

SPECIFIC PURCHASING CATEGORIES

HOW TO USE IT?

The screenshot shows an Excel spreadsheet with a table of ecofriendly criteria. A green arrow points from the 'Local Food' criteria row to the 'Quotation Request' form.

Criteria	Supplier Questionnaire (Call for tenders)
Local Food	Supplier visit for verification
Organic or in-conversion food	Definition in TOR + check during samples / presentation of the catering kit
Respect for product seasonality	Definition in TOR + check during sampling / presentation of the catering kit
Food waste management	Definition in TOR + check during sampling / presentation of the catering kit
Zero waste catering (prohibit the use of single-use products, prefer cutlery and washable containers, tupperware ...)	Supplier Questionnaire (Call for tenders)
Vegetarian menu (Finding alternatives to beef (limiting greenhouse gases))	Supplier visit for verification
Reusable packaging / doggy bag / Recyclable	Supplier Questionnaire (Call for tenders)
Employment of people from the community/or in professional reintegration	Supplier visit for verification
Treatment of food oils	Supplier visit for verification

The form is titled 'Bangladesh' and includes a 'Hi' logo. It contains the following sections:

- Date :**
- Purchase Dossier Ref:** PD-UKHI-00809
- Quotation request for**
- Table:**

Item description	Quantity	Unit	Remarks
G00851 - Service - building maintenance (Description : Ms angle frame construction for solar panel in Camp-4 - extra: Ms angle, flatbar, welding work, coloring etc)	1	ls	
- Delivery conditions:**
 - Delivery address and date:
 - Risks and insurance related to the transportation of the items to the above mentioned address will be the responsibility of the supplier
- Payment conditions :**
 - Payment after delivery inspection and written acceptance
 - Payment by bank transfer or cheque
- General conditions:**
 - If the supplier does not attach his Sales Terms and Conditions of Sell with its quotation , HI Terms and Conditions will apply by default (available upon request to HI)
- Additional specifications:**
- Minimum information to provide on the quotation**
 - 1 - Name, address, phone and contact person
 - 2 - Characteristics of the items offered (to attach documentation if relevant)
 - 3 - Quantity available
 - 4 - Delivery time or Ex stock + location
 - 5 - Unit price
 - 6 - Total price
 - 7 - Currency of the offer
 - 8 - Validity of the quotation
 - 9 - Date, stamp and signature.
- Unless otherwise specified on the quotation form, conditions below prevail:**
 - All packing, loading, unloading and transport costs will be the responsibility of the supplier.

The form is titled 'SUPPLIER BID ANALYSIS' and includes a 'Hi' logo. It contains the following sections:

- *If necessary: applies if the quote itself is not enough to enable the purchaser to establish t**
- DATE OF ANALYSIS**
- SUPPLIER RESPECTS GENERAL PURCHASING CONDITIONS (YES/NO)**
- OTHER CRITERIA TO BE SPECIFIED**
- OTHER CRITERIA TO BE SPECIFIED**

HOW TO USE IT?

	A	B	C	D
15		Add the relevant Common and Eco-responsible and inclusive criteria (see table "Common Criteria")		
16		CSR measures environmental policy (e.g. room where towels and sheets are not changed every morning of the stay) and social policy (redistribution system)		
17		Local Food		Supplier Questionnaire (Call for tenders)
18		Organic or in-conversion food		
19		Respect for product seasonality		
20		Food waste management		Supplier visit for verification
21	Ecofriendly criteria	Zero waste catering (prohibit the use of single-use products, prefer cutlery and washable containers, tupperware ...)		Definition in TOR + check during samples / presentation of the catering kit
22		Vegetarian menu (Finding alternatives to beef (limiting greenhouse gases)		Definition in TOR + check during samples / presentation of the catering kit
23		Reusable packaging / doggy bag / Recyclable		Definition in TOR + check during sampling / presentation of the catering kit
24		Employment of people from the community/or in professional reintegration		Supplier Questionnaire (Call for tenders)
25		Treatment of food oils		Supplier visit for verification

demo

[Sustainable Procurement Criteria Database \(SPCD\) of the Sustainable Procurement Working Group, September 2023 – Réseau Environnement Humanitaire](#)

EXPECTED RESULTS OF THE PROJECT

Support the change of practices in the humanitarian and development sector by :

- ❑ Easy to use tool / adapted to different context
- ❑ Sharing the tool (Free access)
- ❑ Technical Tool's continual improvement (as collaborative work)
 - Technical input to wider the different market
 - Getting feedback to complete the tool

CHALLENGES

- ❑ Be “operational” and adapted to all field context
- ❑ Definition of same standard
- ❑ Availability of technical referents to define standard on sustainable and inclusive criteria
- ❑ Technical validation for standard Kits (Clusters) -
- ❑ Buy in / Change of practice

Any questions ?

PRODUCT/SERVICES APPROACH

Select the products that show the best environmental or social results throughout their life cycle or in the life cycle phases where the impacts are most significant.

Professional Accountability

Vehicle rental (All terrain (4*4), Sedan, Mini-Bus, Truck, etc)

Version Française
Version Castellano

GENERAL RECOMMENDATION
General recommendation: adapt your rental car fleet according to your needs. Prefer a low-consumption city car for urban use, than an SUV type hybrids or electric vehicles. If you choose a hybrid vehicle, ask yourself the question of the recharging energy source, which must be low-carbon/polluting, prefer rechargable vehicle rather than hybrid.

EVALUATION CRITERIA	PRIORITY	EXPLANATION OF CRITERIA	SUGGESTED RATING	SUPPORTIVE GUIDANCE / COMMENTS	SOURCE LINKS
Diversified fleet (fleet allowing a choice adapted to the context of use (4*4, city cars, and hybrid or electric model if available))	Essential	The bidder is able to propose environmentally friendly alternatives to petrol/diesel vehicles (e.g. hybrid, electric).	10/10 - the supplier who provides alternative energy vehicles 0/10 - the supplier who provides traditional petrol/diesel vehicles	Definition in the TOR (to be adapted to the context according to the use of the vehicle, if terrain hybrid or electric vehicles are not recommended according to the use and infrastructure in the country (charging stations for all all electric vehicles) or the type of use (complex terrain). In many CO2, alternative fuel sources will not be a viable option because there is not enough infrastructure to support them (e.g., electric vehicles requiring charging points with stable power supply). However, where possible, alternative/hybrid vehicles should be considered.	
Low consumption or economical vehicle with low number of litres per km (indication of the average consumption in the offer)	Essential	The bidder is able to provide economical vehicles with low litres per km. E.g. in urban environment for a pick up type (11-1700 km), etc (look at the technical data sheets on the internet)	10/10 - the supplier who provides the vehicle with the lowest average litres per km. 0/10 - the supplier who provides the vehicle with the highest number of litres per km for the vehicle category (Eliminating suppliers rated on a scale between best / worst supplier)	We should give Essential to vehicles that have lower litres per km or that will produce fewer emissions. We should also give Essential to vehicles that have lower vehicle emissions (this will also be influenced by the number of litres per km). The number of litres per km and emissions will depend on driving style and how the vehicles are used, but most suppliers should be able to provide an estimate of carbon emissions per litre per km. Keep in mind that most manufacturers will also provide estimates of this information on their websites, so even if the supplier can't provide it, the information should be readily available online.	(info fleet form)
Impressiveness or a policy or awareness raising campaign; management of routes (pooling of errands); awareness of moderation in the use of air conditioning	Essential			for context	
Maintenance of vehicles ensuring a limit of unnecessary consumption and management of fluids and consumables. Name the reference garage you work with (agency or leasing unit) (inform us on the agency use installation of fuel filter on the vehicle or use of fuel test strips)	Essential			Verification of garage agreement and follow-up sheet (maintenance booklet) of rented vehicle (its supplier visit and quote maintenance garage)	
Sustainable criteria			10/10 - Bidder who provides the vehicle with the lowest average emissions. 0/10 - Bidder who provides the vehicle with the highest average emissions. (Eliminating suppliers rated on a scale between best/worst supplier)	Ranking: to distinguish the "cleanest in CO2 and most energy efficient" vehicles (Palmaris). Each year, ADEME publishes an official guide entitled "New private vehicles: conventional fuel consumption and CO2 emissions".	Site Carlabelling (http://carlabelling.ademe.fr)

ACF success stories

General sustainable criteria for products / services

Version Française
Version Castellano

Evaluation criteria related to the concept of sustainable and inclusive purchasing :

1) Integrate the principle of 'life product cycle analyses' as criteria for all assets/equipment and items purchased. This includes consideration of the overall cost: including purchase, maintenance and disposal impact (i.e. financial and environmental cost). According to the European Environment Agency, 'Life cycle assessment (LCA) involves the evaluation of aspects-of-environmental aspects-of a product system at all stages of its life cycle. Sometimes also called 'life cycle assessment', 'life cycle approach', 'cradle-to-grave analysis', or 'ecological balance sheet', it represents an emerging family of tools and techniques designed to assist in environmental management and, in the longer term, sustainable development.

2) 'EVALUATION CRITERIA' some criteria require the bidder to provide proof of the criteria, either in or with the bid package (e.g. documentation or sample) or to make a statement based on honor. There may be a cross-check during an eventual technical visit if relevant.

CATEGORY of application	EVALUATION CRITERIA	Essential	EXPLANATION EVALUATION CRITERION	SUGGESTED RATING	SUPPORT ORIENTATION/FEEDBACK	Useful link
General (Goods) or equipment	reusable or recyclable goods		Bidder provides reusable or recyclable goods made entirely (or partly) from recycled material?	10/10 - all goods are reusable or recyclable made from recycled material 5/10 - the goods contain recyclable elements 0/10 - the goods are neither reusable nor recyclable	For example, this may include: 1) the use of recycled paper in educational materials 2) the use of reclaimed wood in construction projects	
General (Goods) or equipment	goods from recycled material		Is the Bidder providing goods made entirely (or in part) from recycled material?	10/10 - all goods are made from recycled material 5/10 - goods contain recycled content or median % 0/10 - the goods are not made from recycled materials	For example, this may include: 1) the purchase of plastic products (bassin) made from recycled plastic (perhaps 50 to 100%)	
					Product Lifecycle Management (PLM, formerly "product lifecycle management") is the name of the field of activity whose purpose is to create and maintain products throughout their lifecycle, from the establishment of the specifications of the product and associated services until the end of life. Durability is the ability of a physical product to remain functional, without requiring excessive maintenance or repair, when faced with the challenges of normal

SUPPLIER APPROACH

Encourage social and environmental responsibility. Engage and select suppliers to promote progressive management sustainable development issues in their process.

Accountability
Procurement/Supply

Supplier questionnaire - Environmental criteria ACF - pilote

Environmental criteria for supplier selection procedures		
ESG (Environment, Social, Governance)		
1	Does your company publish a CSR (Corporate Social Responsibility) and/or sustainability report? If yes, please provide it.	
2	Does your company have a CSR certification? If yes, please provide it.	
SOCIAL		
5	Can you provide examples of social responsibility initiatives or community outreach programs that your company supports?	
6	Does your company have formal written policy(ies) covering environmental protection, working conditions and human rights and incorporating ethical principles? If yes, please provide it.	
7	Does your company have a Diversity & Inclusion policy or approach? If yes, please provide it.	
8	Does your company have a Woman Empowerment policy or approach? If yes, please provide it.	
ENVIRONMENT		
15	Does your company have an environmental management monitoring system in place? (ISO 14001 or equivalent)	
16	Does your company have a waste management policy? If yes, please provide. Does your company monitor its waste generation and/or have an improvement plan in place to reduce waste? If yes, please provide it to prove your policy.	
17	How does your company optimize resource usage (e.g., energy, water, raw materials) to minimize waste generation?	
18	Can you provide examples of initiatives your company has implemented to improve resource efficiency?	
19	Does your company put in place Electronic archiving?	
20	Do you recycle transportation waste? If yes, please provide contact information and the name of the company responsible for the recycling of solid and liquid waste.	

hulo

Operational feedback of the SPCD

Tool

What is Hulo ? Hulo is an innovative cooperative that aims to improve the impact of humanitarian aid by enhancing connections and solidarity between humanitarian logistics stakeholders.

Hulo, composed of 14 members (ACTED, ACF, HI, PUI, SI, OXFAM, MDM, INTERSOS, Bioport, CRF, PLAN, WHH, Fleet Forum, NRC), operates with international and local organizations, academia, and private sector partners.

Its goal is to find new ways of working across organizations and to make humanitarian aid more efficient and collaborative.

Impact

Hulo supports humanitarian actors by pooling their needs and resources, providing in-depth supply chain analysis and developing innovative Digital Solutions. Hulo's approach is data-driven and benefits its participants with:

-  Reduced environmental impact
-  Cost reductions
-  Time savings
-  Improved quality of products and services

Services

-  **Joint Initiatives:** Are open to all humanitarian organisations where **hulo** is present. To date, over 20 stakeholders have participated in Joint Procurement, Transport, Environmental, and HR Initiatives. These initiatives improve the cost, quality, and environmental impact of humanitarian operations.
-  **Digital Solutions:** Development of software and digital tools to facilitate resource pooling and improved logistics management (LINK, Shared Resources, Transport by hulo).
-  **Business Analytics and Research:** Data analysis to provide insights on supply chain management, impact measurement, and operations in the field.
-  **Air, Land, and Sea Transport:** Hulo works closely with DG ECHO and over 30 humanitarian organisations to facilitate the efficient running of EU Humanitarian Airbridge (EUHAB) operations.

The background features several overlapping, wavy yellow lines that create a decorative, organic pattern across the slide.

How do participants in the hulo cooperative use the SPDC tool?

1. Joint Procurement Initiatives (JPIs)

Presentation

Joint Procurement Initiatives (JPIs)

What is it ? Joint Procurement Initiatives (JPIs) consist of hulo coordinating and facilitating the competitive bidding process, where it has been determined that participants can save significant time or money from the pooling of resources.

Where ? Hulo is currently active across Africa (CAR, DRC, Burkina Faso), the Middle East (Lebanon and Iraq/Syria coordinated from Jordan), Colombia and will be expanding to additional countries in 2024.

Objective in Hulo's JPI: Promoting the integration of sustainable and responsible purchasing criteria into all calls for tenders

KPI: 100% of tenders have at least 10% (could be more) of the points in the technical analysis on ESG criteria Environmental, social, and governance (ESG)

The background features three overlapping, wavy yellow lines that create a sense of movement and flow. These lines are positioned behind the text, framing it and adding a modern, organic aesthetic to the slide.

Feedback from suppliers, participating NGOs and hulo staff in the field

2. Operational feedback of the SPCD Tool

Calls of tender in which SPDC criteria have been incorporated :

JPI	Country	Date	Nb of participating NGOs
INTIMATE HYGIENE KITS	CAR	11/23	10
REPROGRAPHY	DRC	10/23	9
REPROGRAPHY	Burkina Faso	12/23	17
CAR RENTAL & DRIVER HIRE	Lebanon	11/23	9
INFANT FLOUR	Burkina Faso	03/22	11

Others currently in progress:

- **Burkina Faso : IT equipment, School equipment**
- **DRC : Ironmongery**
- **CAR : CASH, Vehicle spare parts, Human-powered pumps**
- **Lebanon : NFI, Accommodations, Health Insurance**

- 1. Need to simplify (or explain) the terms used: terms such as "Life Cycle Assessment" "Reverse Logistics" "ISO" and others - many of the suppliers we met are doing things, for example to manage their waste/recycling, but as the terms are not in "easy French" to quote them, they don't respond and so we don't make the most of what already exists!**
- 2. The JPI is an opportunity to raise awareness and open up discussion on these subjects: don't hesitate to pass on information, provide a glossary, an explanation of ISO, photos of the label mentioned in the tender, etc.**
- 3. Make the questions more concrete to facilitate (1) understanding for suppliers, and (2) scoring for participating NGOs: for example, avoid the question "do you have an environmental/waste management policy?" and instead ask "please provide examples of receipts/payments from a waste collector".**
- 4. Don't rely only on declarative answers (always ask for supporting documents/pictures).**
- 5. Add questions on ESG criteria to supplier visit questionnaires (look under the shelves, the packaging may be hidden ...).**

- 6. Clarify the scoring:** it often works better to give 1 point if the supplier submits such and such a document, 1 point if it has x amount of equipment, etc than a score like this: 10/10 - Bidder is able to provide xxx. 5/10 - Bidder is able to provide xxx. 0/10 - Bidder is unable to provide specific xxx.
- 7. Adapt the criteria to each lot/batch AND to each location** when the items are too different and the differences between regions are too important (of transport, waste, etc.)
- 8. Taking advantage of the JPI to put bidders and recyclers in touch with each other:** Some bidders need to find waste management solutions, while recyclers need quantities of waste.
- 9. For NGOs:** do not analyze ESG criteria last, but include them in the technical analysis as criteria in their own right.
- 10. For the NGOs:** Hulo tries during the workshops before the JPIs (when defining the criteria) to choose criteria in a collaborative way. However, few logistics coordinators in the field are yet proactive because few are aware that the tool exists, and few have ideas for this type of criteria, which is still new.

Thank you !

Any question ?

Any questions ?

Do you have good practices to share ?

CONCLUSION

- ❑ Need for **change** in the sector
- ❑ Importance of **aligning** with the sector's selection criteria
- ❑ Pool services = mass => **negotiating factor**
- ❑ Importance of getting feedback for **continual improvement**
- ❑ **Support of the donor community** – accepting fair price/ real cost

CONCLUSION

As living tool – we need your feedback

The image is a screenshot of the REH website. At the top, there is a green navigation bar with the REH logo on the left, the text "Réseau Environnement Humainitaire" in the center, and a search bar on the right with "Search for a resource" and "OK" buttons. Below the search bar are "LOGIN" and flags for the UK and France. A secondary navigation bar below that contains links for "WHO ARE WE?", "NEWS", "RESOURCES", "JOIN THE REH", and "CONTACT". On the right side of this bar is a link for "NGO STATEMENT OF ENGAGEMENT ON CLIMATE".

The main content area has a breadcrumb trail: "Accueil - Sustainable procurement - Sustainable Procurement Criteria Database (SPCD) of the Sustainable Procurement Working Group, September 2023". Below this is a hashtag "#TOOL REH". The main heading is "SUSTAINABLE PROCUREMENT CRITERIA DATABASE (SPCD) OF THE SUSTAINABLE PROCUREMENT WORKING GROUP, SEPTEMBER 2023". The date "Published on 19 September 2023" is shown below the heading.

The text describes the tool: "The Sustainable Procurement working group of the Réseau Environnement Humainitaire (REH) has developed an updated version of the field-oriented 'Sustainable Procurement Criteria Database' (SPCD). This tool offers a list of sustainable procurement criteria (environmental and social criteria) on 30 goods and service categories and is available in English, French, and Spanish."

It also states: "The objective of the tool is to be collaborative that will be adjusted and updated upon receiving user recommendations and feedback. It is open for feedback (in [French](#), [English](#) and [Spanish](#))".

Finally, it says: "Tutorial videos are available in all three languages [here](#)."

A dark grey box on the right side of the page contains a "USEFUL LINKS" section with the following items:

- > DOWNLOAD THE TOOL
- > FEEDBACK SURVEY (FRENCH)
- > FEEDBACK SURVEY (ENGLISH)
- > FEEDBACK SURVEY (SPANISH)
- > TUTORIAL VIDEOS (IN ALL THREE LANGUAGES)
- > INTRODUCTION WORKSHOP (FRENCH)
- > INTRODUCTION WORKSHOP (ENGLISH)

The REH logo is visible in the bottom right corner of the page.
